

Project Design Phase-I

Proposed Solution Fit

Team ID	PNT2022TMID24052
Project Title	University Admit Eligibility Predictor

Problem-Solution fit

Purpose / Vision

Define CS, fit into CC	<p>1. CUSTOMER SEGMENT(S)</p> <p>Students who have recently completed their schooling/College and aspire to get admitted into prominent universities.</p>	<p>6. CUSTOMER CONSTRAINTS</p> <p>Customers might not trust the accuracy/reliability of the predictor and this could prevent them from using it.</p> <p>Moreover, users would have to feed confidential information to the model, so a certain section of customers might refrain from using the predictor due to a fear of data misuse.</p>	<p>5. AVAILABLE SOLUTIONS</p> <p>Apart from factors like grades and GPA, we will also consider IELTS/TOFEL/GRE that plays major role in the admission process of some universities, thereby further enhancing the reliability of the predictor.</p> <p>Secondly, we will put the model through rigorous tests in order to boost the accuracy of the predictor.</p>	Explore AS, differentiate
Focus on J&P, tap into BE, understand RC	<p>2. JOBS-TO-BE-DONE/ PROBLEMS</p> <p>Data collection is probably the most important step in designing the predictor hence it must be ensured that it is done properly.</p> <p>Customers should be assured of optimum data security in order to sustain their trust in our model.</p>	<p>9. PROBLEM ROOT CAUSE</p> <p>The reliability of the predictor might be affected if the collected data is found to be inaccurate or not enough factors are considered to judge the eligibility.</p> <p>Secondly, customers might refrain from using our product if they find it to be prone to cyber attacks.</p>	<p>7. BEHAVIOUR</p> <p>The most important aspect of the predictor from a customer's point of view is its accuracy, since they would go through with their admissions based on its results.</p> <p>.</p>	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	<p>3. TRIGGERS</p> <p>User can be provided with comparisons between the required scores versus their actual scores.</p>	<p>10. YOUR SOLUTION</p> <p>Design a predictor with the help of the data collected, and ensure that it is accurate/ reliable. Also make sure that the data collected from the users is safe and secure.</p>	<p>8. CHANNELS of BEHAVIOUR</p> <p>Customers might search for reliable eligibility predictors that are available online and rate them based on their liking.</p>	Extract online & offline CH of BE
	<p>4. EMOTIONS: BEFORE/ AFTER</p> <p>Users would feel that they are in complete control in the admission process since they can wholeheartedly trust the predictor.</p>		<p>Students would discuss amongst their peer group about such predictors and if they find one to be reliable enough, they would spread the word about it.</p>
